EDUCATION

University of Michigan, College of Engineering

Expected Graduation: May 2027

B.S.E. in Computer Science | Minor in UX Design

GPA: 3.56/4.00

- **Relevant Coursework:** Data Structures & Algorithms, Web Systems, Statistics & Data Analysis, User Interface Development, Cybersecurity, Data-Driven Applications, Web Development & Accessibility, Applied Agentic Software Engineering

WORK EXPERIENCE

Axon Enterprise

June 2026 – August 2026

Product Management Intern, Virtual Reality — Leadership Development Program

Phoenix, AZ

- Built and launched AI-powered proposal evaluation tools across ChatGPT, Claude, and Cursor, automating source updates, streamlining proposal review workflows, and reducing the risk of outdated product claims in customer-facing documents.
- Investigated the end-to-end Virtual Reality Trial Kit experience, combining customer journey analysis with large-scale usage data to uncover usage patterns, identify friction, and inform conversion-focused product and trial experience improvements.
- Analyzed VR return data to identify 420+ devices for deactivation, uncovering ~\$30K in annual savings and recommending reporting improvements to surface return drivers, prioritize product improvements, and enhance customer experience.

The Social Television Network

June 2025 - August 2025

Product Strategy & Growth Intern

Phoenix, AZ

- Conducted product, user, and market research to inform growth strategy, analyzing audience behavior, content performance, and competitive positioning to identify opportunities for acquisition and engagement across 3+ distribution channels.
- Developed product strategy recommendations by synthesizing qualitative insights and performance data, contributing to roadmap discussions around feature prioritization and audience growth initiatives supporting near-term growth goals.

Atlas Neurosurgery

June 2025 - August 2025

Full Stack Development Intern

Phoenix, AZ

- Owned the design and launch of a patient intake and triage product, translating clinical and business requirements into a survey-driven scoring system that ranks prospective cases by fit and acuity to inform patient prioritization and growth decisions.
- Enabled higher-value patient acquisition by surfacing high-acuity cases earlier while reducing manual review by 30% for staff.

Epsilon Eta Professional Environmental Fraternity

January 2025 - April 2025

Website Developer

Ann Arbor, MI

- Drove end-to-end redesign and development of the Epsilon Eta chapter website, designing in Figma and implementing the final product with HTML, CSS, and JavaScript to improve clarity, usability, and engagement for prospective and current members.
- Published a website that drove a 30% increase in club applications, translating goals into design, from wireframes to production.

LEADERSHIP EXPERIENCE

Tau Epsilon Kappa (Professional Technology Fraternity)

September 2025 - Present

Project Manager

- Led a 6-person cross-functional student team to deliver a semester-long product, establishing Agile workflows and sprint goals.
- Defined product definition and scope by creating documentation and PRDs, translating constraints into an MVP roadmap.
- Delivered a coffee chat tracker used by 60+ club members, coordinating frontend-backend implementation from build to launch.

VP of Internal Affairs

March 2024 - May 2025

- Owned full planning and execution of 15+ chapter-wide events, defining calendars, timelines, and logistics for 100+ members.
- Introduced new social and networking initiatives based on member feedback, resulting in a 25% increase in fraternity revenue.

The Michigan Daily

Data Team Manager

August 2025 - Present

- Managed a 3-person team to translate open-ended questions into structured analyses across technical and non-technical teams.
- Built end-to-end data pipelines using APIs, Python, SQL, and Cloudflare to analyze academic performance and transit reliability.

SKILLS

- **Product & Tools:** Figma, Jira, Linear, Notion, Salesforce, Canva, ChatGPT, Claude, Cursor, Gemini
- **Technical & Data:** SQL, Python, Ollama, Aider, Snowflake, Sigma, Excel, JavaScript, React, Flask, Django, C/C++
- **Interests:** Weightlifting, Running, Sewing, Badminton, Graphic Design, Writing, Meditation
